JUNIOR SOFTWARE ENGINEER — REMOTE OR LOCAL (WILLING TO RELOCATE)

6+ years of real-world experience as a software engineer from Round Rock, Texas, with a passion for innovation, critical thinking, and taking the initiative. Primarily self-taught prior to higher education, embracing challenges through passion projects and LeetCode coursework. Excels in adaptation, using AI assistance to both discover and refine strategies. Job hunting and working on a personal website (full stack) since graduation while employed in customer service.

Projects

Cat Clicker / Sole Developer and Game Designer (2020–Present) — 2098 lines of written code / **C#, .NET, UnityEngine**

Source Code — <https://github.com/JASteads/Cat-Clicker-2025> (Images included)

Project Type — Indie videogame production (idle clicker)

Description — Actively building a game that puts an immersive twist on the idle genre with a fun story about technology and the concept of infinity—and cats. Applies user feedback via one-on-one conversations and community discussion on Discord. Pending publication as a work-in-progress on a personal website once the site becomes available.

OsuDecompPro / Sole Developer (July 2021) — 846 lines of written code / **C-programming language, stdlib.h, Batchfile**

Source Code — <https://github.com/JASteads/osuDecompPro> (Images included)

Project Type — Low-level file decoding/encoding

Description — Exercised extensive bitwise operations, file I/O, and memory allocation to decode stage files from the game Osu into programmable objects. This enables developers to use customized editors to modify the decoded data and re-encode into playable stage files using osuDecompPro.

District 4 Site / Sole Developer (Present) — 1264 lines of written code / **HTML, CSS, JavaScript, Express, PostgreSQL**

Source Code — <https://github.com/JASteads/District4-Website> (Images included)*

Project Type — Public blog, gallery, and marketplace for self-made products

Languages & Frameworks

- C/C++, C#, Java, JavaScript, TypeScript, Python, HTML, CSS, SQL
- .NET, Discord, UnityEngine, WinForms, Microsoft SQL Server, Sqlite3, Express, PostgreSQL, Node.js

Skills

- AI-assisted Development
- Game Systems & Design
- UI/UX Design
- Full Stack Web Development
- Database Engineering
- MVC System Architecture
- QA & Unit Testing
- Agile/Scrum Methodology
- Customer Service

Education & Courses

LeetCode, 49 Easy Exercises, 20 Medium Exercises / **Data Structures & Algorithms, Databases, JavaScript**

LeetCode 30 Days of Javascript (April 2026)

B.S. Computer Science, *Texas State University*, San Marcos. **Summa Cum Laude** (Summer 2024)

A.S. Computer Science, *Austin Community College*, Round Rock. **Summa Cum Laude** (Summer 2022)
